Arens, Elder, Beasley and Hegazy: Auditing and Assurance Services

Here at Pearson, our breadth of international experience has shown us that learning resources are most successful when they are relevant and contextualised to those that use them, because when it comes to learning, a one size fits all approach just won't do. That is why Pearson has created the Arab World Editions, a collection of new and adapted titles across a range of subjects that take into account the distinct learning styles of Arab students and the unique cultural, religious and linguistic background of learners in this part of the world.

For Arab students of auditing and accounting comes the Arab World Edition of Arens, Elder and Beasley's Auditing and Assurance Services, presenting an integrated concepts approach that shows students the auditing process from start to finish, all the while focussing on its application in the Arab region.

Using a student friendly approach, the Arab World Edition of Auditing Assurance Services covers all key aspects of the discipline, including:

- Audit and Assurance Services
- The Public Accounting Profession
- Audit Reports
- Legal Liability
- Professional Ethics
- Audit Responsibilities and Objectives
- Audit Evidence
- Audit Planning
- Analytical Procedures
- Materiality and Audit Risk
- Fraud Auditing
- Audits of Internal Control and Control Risk

This book is accompanied by adapted PowerPoint slides, instructor manual, test bank generator and online tutorial and homework system

MyAccountLab[®]

The operations and structure of the various professional bodies of the region are analysed in detail. Emphasis is placed on giving readers a thorough understanding of the regulatory environment of Arab countries, with discussion of SOX minimised, and more attention given to comparing SOX with local laws. The text continues to introduce students to the importance of the SEC in the USA, but a new discussion of the General Financial Supervisory Authority in the Arab world is also incorporated, as are key examples of local malpractice.
